

STEP 1

Download the folder named remote access to your PC's desktop then open the folder which relates to the operating system on your home pc

Windows XP

Vista 32 bit

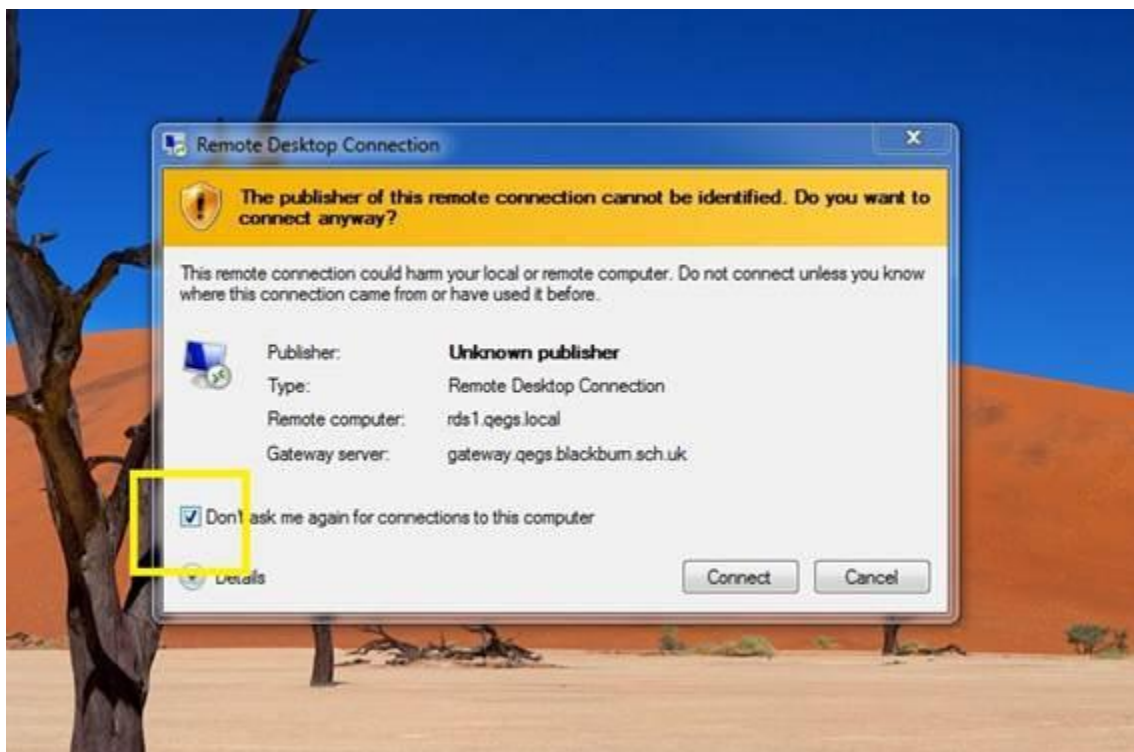

Vista 64 bit

(Windows 7 PC's already contains this update therefore this step can be ignored)

Double click the file(s) that is contained within and click next to initiate the update(s). The update process should take less than a minute to complete and is a one-time exercise.

STEP 2

Copy the file named windows remote desktop.rdp to your PC's desktop and double click it. You will see this certificate warning:

Tick the box and click connect (you will not have to do this again)

You will now have a login box

Enter your username and password and you will gain access to the schools network
